ADVANCING ORTHODONTIC EXCELLENCE

As an orthodontic professional, you strive each day for ideal clinical results, recognizing the accessibility, comfort, and relationship that your patients value along the journey. Join us for our **European Carriere® Symposium**, where industry leaders from around the world share progressive concepts and technologies that improve efficiencies, finishing excellence, and the patient experience.

The **European Carriere Symposium** delivers a comprehensive array of the most advanced practice workflow and clinical solutions available. Learn how leading practitioners are challenging industry views on traditional clinical approaches and driving strategic growth in the wake of the pandemic. Discover creative solutions to differentiate your practice and achieve remarkable, efficient results, incorporating novel workflows that are critical to success.

All presentations will be delivered in English.
Simultaneous translation will be provided during the general session in Portuguese, Spanish, French, and Italian.

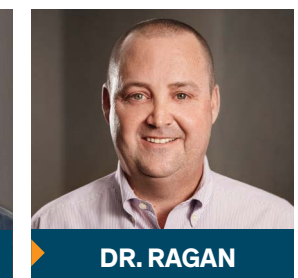

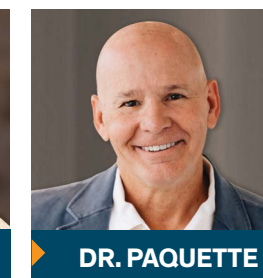

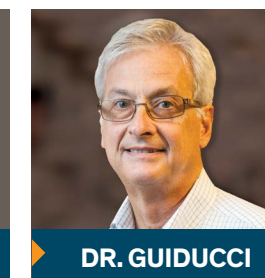

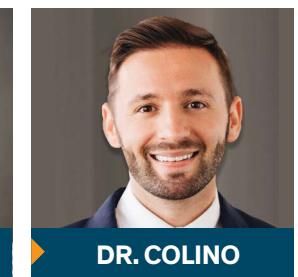

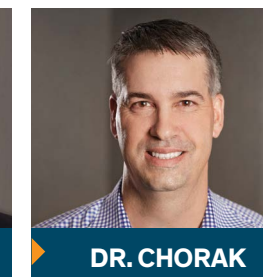

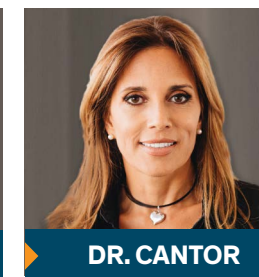

MINIMUM TOUCH ORTHODONTICS

Minimum Touch OrthodonticsSM (MTO) is a **new treatment philosophy** that blends contemporary clinical principles with advanced digital solutions in a **seamless workflow** to deliver remarkable and predictable results. Approached holistically, MTO encompasses every protocol, every aspect of patient care, and communication. During the **European Carriere Symposium**, we will explore how MTO can help you:

- Maintain or grow your case starts and same-day starts (SDS) capacity.
- Attract a greater number of new patients by offering unparalleled convenience with fewer and shorter appointments.
- See fewer patients in person while staying connected virtually, maintaining critical touch points.
- Give your patients a comfortable experience and a brilliant, selfie-ready smile in as few as 10 to 14 months.
- Increase your revenue growth, catering especially to patients who favor convenience and might otherwise opt for Direct-To-Consumer solutions.

In addition, you will learn which in-person appointments can be replaced by virtual visits and **how to streamline in-person visits** while making the procedure less invasive and providing excellent clinical outcomes.

*Join us for the European Carriere Symposium
and discover how to incorporate MTO into your practice today.*
