DIGITALIZATION IN ORTHODONTICS

A common lecture for both
Orthodontists and Technicians

Friday, September 9th 2022
Zurich, venue to be announced

**ORTHO
WALKER+**

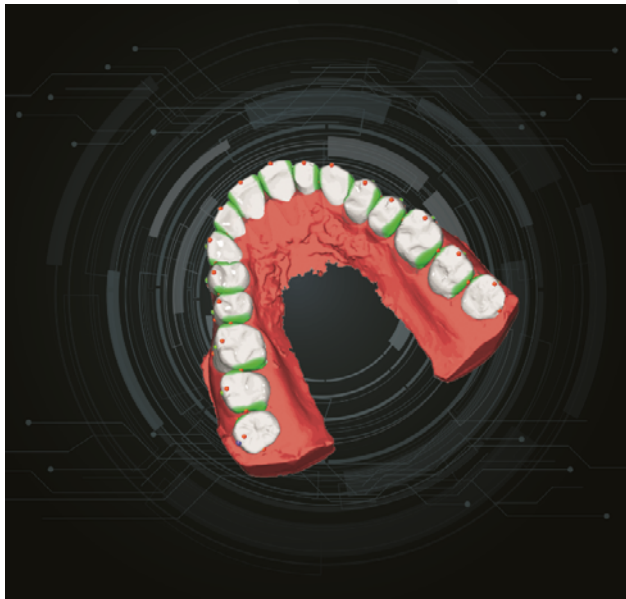

DIGITALIZATION IN ORTHODONTICS

A COMMON LECTURE FOR BOTH ORTHODONTISTS AND TECHNICIANS

Common lecture for both Orthodontists and Technicians to raise awareness for a close cooperation in the area of digital workflows and working hand in hand for better treatment results.

Replacement of traditional techniques by digital alternatives
Digital Appliance Design: What & How, which are advantages and disadvantages of digital appliance design CAD/CAM & 3D Printed Metal Appliances

Orthodontics is changing rapidly. Traditional techniques are replaced by digital processes and devices and there is no other way to survive than adapting to current developments. Continued Digitalization goes along with new techniques and appliances, streamlined processes and all new workflows.

This course shall introduce and enlarge upon digital topics in orthodontic laboratories: From digital workflows and processes to state of the art appliances allowing for quicker handling of orders to increase customer satisfaction.

In addition to a standard lecture, the course is supposed to be interactive with questions and discussions to get an idea of the future way in orthodontic laboratory work.
