

TUITION: COMPLIMENTARY

Explore *Motion*[™] Use Beyond Bite Correction

Taking *Motion* & finishing to the next level!

DESCRIPTION

As an early adopter of innovation, Dr. Ragan has pushed the boundaries of the *Sagittal First*[™] treatment philosophy and the many ways the *Motion* appliance can be utilized to shorten treatment times in both Class II and III cases, and sometimes even on Class I cases (e.g. Double *Motion*).

In this course for experienced *Motion* users, Dr. Ragan will review cases that even surprised him on how he was able to drive greater efficiencies, shorter treatment times, and long-term aesthetic results with minimal extractions. He will also highlight case challenges and share tips on how to avoid common pitfalls in various complex treatment scenarios. With his most recent treatment integration of the new *Carriere*[®] *Motion Pro*[™] bite corrector, learn how he applied his techniques to treat Class III cases with this new appliance, and how he optimizes the treatment features (including the new Drop-In Hook) and his tricks for utilizing the condyle shape and torquing range. And finally, this course will include his preferred methods for ideal case finishing after *Motion* with brackets or aligners.

KEY LEARNING OBJECTIVES: At the end of this course the participant will be able to...

- Optimize *Motion* mechanics to accelerate finishing with brackets and/or aligners
- Learn efficiency advancements with same day starts and decreased treatment times
- Review his unconventional uses of the *Motion* appliance
- Understand the advanced features of *Motion Pro*
- Compare features and case results of *Motion Pro* vs *Motion 3D*[™]
- Avoid common case pitfalls & overcome treatment challenges
